- *Minimize downtime by increasing product knowledge*

Flexible Solutions

ONYX offers flexible training solutions that will fit into your schedule and budget

- *On-site consulting*
- *Instructor-led web based training*
- *On-demand training videos*

"We are nothing short of fully impressed by the ONYX consultant's knowledge, approach, and problem solving ability to meet our training needs. He not only explained the how but more importantly the why in calibrating our machines for quality color management, setting up quick set templates and explaining the capabilities of the ONYX software. We made the right decision investing in ONYX."

For questions regarding training, please contact us at training@onyxgfx.com

TRAINING

On-site Consulting

Custom on-site consulting offers your facility the best opportunity to get the exact educational experience possible for your unique setting. Our ONYX consultant will be on-site for two full days covering the topics you need most.

Advanced Color Profiling focuses on the proper steps for calibrating, generating a color profile, and maintaining color management parameters.

Advanced Custom Start-Up focuses on your exact workflow needs and helps you to get up and running quickly, and efficiently.

Available in North America only. Includes all travel and related expenses. Contact your local reseller or ONYX for pricing.

Advanced Custom Training

Convenient web-based training that fits your schedule and budget. Customized to your exact needs for up to 10 participants. You will have two hours to cover the topics that you need the most.

Web-based Training

Live interaction with the instructor in modular classes that allow you to choose the training subjects best suited for you. A variety of session dates and times are offered for your learning convenience. Attend these cost effective web-based courses in the convenience of your own work environment with no travel expenses.
