

# ONYX THRIVE

## A solution that grows with your business

ONYX Thrive is the only truly scalable end-to-end workflow solution with network licensing to optimize any size print shop, maximizing production and avoid costly downtime.

### Scalable network for total flexibility:

ONYX Thrive provides a network-based license for a long term solution to grow with your business. Users can easily add RIPs, printers, workflow modules and job editors to meet the demands of any print environment.

- Submit jobs from anywhere with Thrive Production Manager
- Take complete control of production at the click of a button
- Reduce prepress, proofing cycles and reworks

With 100% Adobe technology throughout, ONYX Thrive enables users to print right the first time.

## Reach new heights with ColorCheck:

New for ONYX 18 and exclusively for ONYX Thrive is ColorCheck: a new process control tool for users to prove color accuracy, consistency and conformance to standards including G7 and Fogra.

Easily match your customer brand-color needs consistently over time across all your devices and build repeat business.

*“ONYX Thrive has had a large impact on our business. With as much equipment as we have running at any one time, Thrive has been instrumental in keeping us fast, reliable and consistent.”*

- Aaron Holland, DSR.

## Step and Repeat:

With applications into decor, decal printing and soft-signage, ONYX Thrive Step and Repeat allows users intuitive control to create patterns with PDF or any raster images and automated cutting workflows.
